## Custom Albums

Albums that you create to organize photos

Unlimited number of Albums

Does not duplicate photos (See my Rules)

Replicate to iCloud & other devices

Great for:

- Slideshows
- Memory Movie

You can organize Albums in Folders (beyond this session)

# Photo Albums Rules

Photos are always stored in the Recents/All Photos album. This is the "master" copy of the photo.

Look for new Photos under Recents

Photos are automatically organized into default/predefined albums, i.e. Media types, People, Places & Categories

• People is the only default album that can be modified.

Create unlimited custom albums to organize your photos for display, printing, browsing, slide shows and sharing.

A photo can be placed and found in multiple custom albums

Photos are only stored once, not duplicated. There is a "master" copy in Recents/All Photos. Custom albums only contain pointer to the master.

When you delete from Recents or All Photos you are deleting the photo from the devices and iCloud

You can remove a photo from an album w/o deleting the photo

Create a Custom Album

Two Methods:

1. Select Photos first, Share, Add to Album, New Album

Most Intuitive

2. Create Album First, Add Photos
